Github: https://github.com/NithinReddyChereddy Mobile: +91-7780485794

## Skills

- **Programming:** Python, SQL, C++
- **Data Analytics:** Power BI, DAX, Data Modeling, Data Visualization, Exploratory Data Analysis (EDA)
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Tools/Platforms:** Hadoop, Hive, Git, GitHub, Jupyter Notebook, VS Code, MS Excel
- **AI & Automation:** Gemini API, Prompt Engineering

## Projects

**Hospital Operations & Patient Analytics Dashboard** | **Live Demo** Jul 2026 – Aug 2026

- Consolidated and analyzed 10,000+ hospital records from multiple datasets to create a unified dataset for patient, operational, departmental, and resource analytics.
- Performed data cleaning and validation by handling missing values, standardizing data types, removing duplicates, and validating admission, discharge, transfer, and resource-related fields.
- Engineered 10+ operational KPIs including admissions, discharges, average length of stay, readmission rate, transfer rate, bed utilization, ICU occupancy, staff utilization, and equipment usage.
- Designed a 4-page interactive Power BI dashboard covering Hospital Overview, Patient Flow, Department Analytics, and Resource Utilization.
- Built KPI cards, trend analysis, department comparisons, slicers, synchronized filters, bookmarks, and page navigation for interactive hospital performance monitoring.
- Analyzed patient flow, departmental performance, resource utilization, capacity, and billing patterns to identify operational trends and support data-driven decision-making.

**Tech**: Power BI, DAX, Data Modeling, Data Visualization.

**DataSynth AI - Self-Service Data Analytics Platform | Live Demo** Feb 2026 – Apr 2026

- Developed a self-service data analytics platform that converts CSV/XLSX datasets into interactive dashboards and analytical reports.
- Automated data profiling, cleaning, missing-value detection, outlier analysis, and exploratory data analysis (EDA) using Python and Pandas.
- Built dynamic trend, distribution, and correlation visualizations based on dataset characteristics to accelerate exploratory analysis.
- Integrated the Gemini API to generate natural-language insights and enable conversational exploration of business datasets.
- Streamlined the data analysis and reporting workflow by combining automated profiling, visualization, and AI-generated insights, reducing manual analysis effort.

**Tech**: Python, FastAPI, Pandas, NumPy, Gemini API

**Data Analysis: California Crimes Analysis** | **GitHub** Jan 2025 – Feb 2025

- Analyzed 20,000+ crime records using Python to identify geographic and temporal crime patterns.
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to improve dataset reliability.
- Investigated crime trends across regions, crime categories, and time periods to identify high-risk areas.
- Created analytical visualizations and statistical summaries to support insight generation and trend monitoring.
- Automated data analysis workflows using Pandas, reducing manual processing effort.

**Tech:** Python, Pandas, NumPy, Matplotlib, Seaborn.

## Certificates

- Oracle Data Platform 2025 Certified Foundations Associate |**Oracle** Mar 2026
- TechA Data Analytics using Power BI Foundation Certification |**Infosys** Dec 2025
- Tata's GenAI Powered Data Analytics job simulation |**Forage** Sep 2025

## Achievements

- Led a 3-week community drive (38+ hours) collecting and distributing unused clothing and toys to local orphanages to support underprivileged children.

## Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.5*** 2023 – Present
- **Sri Chaitanya junior college** Andhra Pradesh, India
  Senior Secondary Education - ***Percentage: 85.00*** April 2022 – March 2023
